

Crest Advisory are crime and justice specialists – equal parts research, strategy and communication. We work with police forces, PCCs, central and local government, research trusts, businesses, public inquests and inquiries, think tanks and more. We produce research reports but also practical strategy, advice and training to support frontline practitioners.

Crest Advisory has been commissioned by the Office of the Police and Crime Commissioner for North Wales (OPCC) and partners involved in the Serious Violence Prevention Programme to provide a response strategy, in line with the Duty, which is based on the findings of a Serious Violence Strategic Needs Assessment (SNA). This strategy will be used to inform the local response as well as the commissioning of services in North Wales from April 2024 and beyond. By contributing to this project, you will also be helping to ensure that the response strategy is aligned with other strategies and commissioning approaches in this space.
